EUVECA

European Platform for Vocational Excellence in Health Care

EUROPEAN PLATFORM FOR VET EXCELLENCE IN HEALTH CARE

EUVECA is an ERASMUS+ project designed to support the needed innovation and development of the health care sector. It seeks to ensure the provision of future-oriented skills within the sector.

This will be done through the creation of Regional Vocational Excellence Hubs in 7 European regions which collaborate within a European Platform for Vocational Excellence in Health Care.

ABOUT EUVECA

EUVECA overall objectives:

1. Increasing the quality and attractiveness of vocational training and lifelong learning within the European health care sector and within health care education.

2. Contribute to the implementation of the European skills agenda by ensuring continuous and high quality VET to professionals in the health care sector focusing on improved and tailored lifelong skills training, covering 21st century skills.

3. Contribute to the implementation of the European Education Area by creating long term sustainable collaboration within higher education and VET.

Methodologies to achieve the objectives

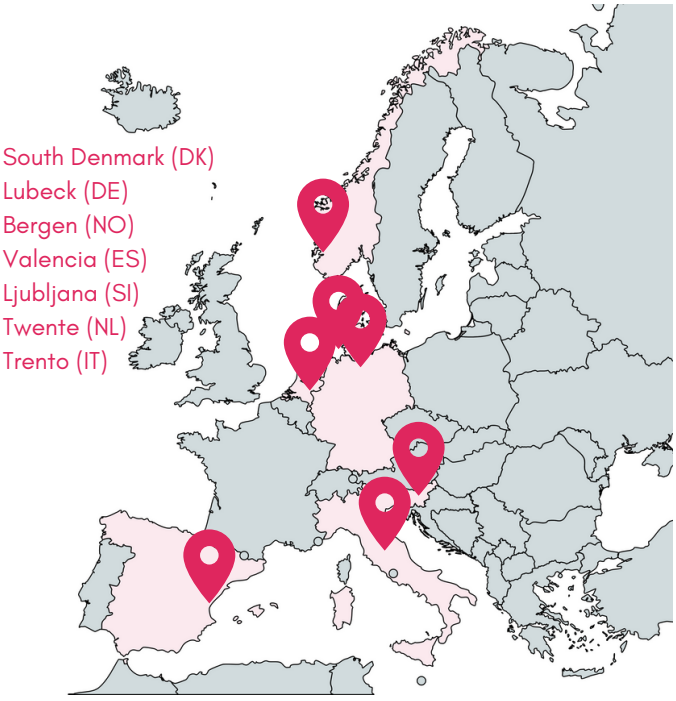
Partners and their regional stakeholders will co-create a governance model and concrete education and training activities for the seven regional hubs.

A European platform will be developed, tested, fine-tuned and made sustainable to uptake regional partnerships beyond the partnership.

EUVECA impact:

The overall ambition of the EUVECA project is to show that by including a strategic and coordinated focus on VET in the work and collaboration within the regional health eco-systems, VET can contribute in a substantial way to move innovation forward within the European health care sector and ensure the sustainability of the sector on both a European and regional level.

7 Regional Vocational Excellence Hubs



Co-funded by the Erasmus+ programme of the European Union under Grant Agreement number 101056415.
